

# Glutton H2O Perfect

## Electric vacuum cleaner

Glutton H2O Perfect is a self-propelled electric vacuum cleaner that picks up waste from various nooks and crannies and deep cleans what is left. It allows you to work outdoors, as well as in plants or industrial halls. An ideal device that facilitates the work of cleaning personnel, providing significant savings in time and energy.

As part of SAMSIC TESTS, we organized tests of this innovative collection vacuum cleaner at the facility of one of our customers. The crevice tip in hard-to-reach places such as bumpers did not work well, it is too big and also does not have the suction power to collect all the dirt. Other than that, we 100% recommend this machine. This machine is equipped with a medium-pressure compressor, a carbon suction tube and a dust filter, which makes the exhausted air cleaner than the one we breathe. Glutton collects cigarette butts, cans, bottles, wood or aluminum chips.

Equipped with an **ergonomic spray gun** that is easy to carry in an integrated handle. with a medium pressure compressor, water tank, pump and filter. The jet pressure can be adjusted on the handle (concentrated or diffused).

- ✓ Effective dust filter with an area of 24m<sup>2</sup> (ISO5011 compliant)
- ✓ Self-propelled, ergonomic and highly maneuverable
- ✓ Very long battery life, environmentally friendly, zero CO<sub>2</sub> emissions
- ✓ Equipped with a medium pressure compressor: has a water tank, spray gun with hose
- ✓ Easy to guide by personnel: ambidextrous guide arm

Do you have questions? Ask your supervisor at the facility! Feel free to contact us!
